# spritzers play Capture The Flag competitions

- Cybersecurity competitions
- Goal is to find the **CTF{funny\_l33tsp34k\_f1Ag}** in a set of challenges
- Using classical infosec techniques:
  - Binary exploiting / pwning
  - Reverse Engineering binaries / protocols / crypto
  - Web security (from SQL injections to JS / PHP magic)
  - Forensics
  - ...

# CTFs are **JEOPARDY** or **ATK/DEF**

- In **Jeopardy** there are puzzles to solve
  - binary pwn / exploit
  - rev
  - crypto
  - web
  - misc (PPC, misc, stego, osint, forensics)
- Every challenge gives points (w.r.t. difficulty OR # of solves)
- Everyone vs. challenges
  
- In **ATK/DEF** everyone has VMs with vulnerable services
  - patch yours / attack others
- You get points for defending your system & compromising others
- FFA

# spritzers play JEOPARDY (atm)

@abiondo pwn/rev/magic

@kenoph pwn/rev/web/rage

@bonaff web/misc/aperitivi

@daniele jack of all trades (& master of none)

@smunari pwn

@atom web

@you?
